

I REQUEST that the FCC should not implement any type of proposal to lesson the Indiana Telephone Privacy law - it has greatly lessened the phone calls that interrupt our evening family time together.

Every evening we would receive at least 5 calls that interrupted dinner and time with my daughter. Then the phone calls started coming as late at 9pm after my husband went to bed so that he could be up by 4am for work. ANNOYING!!!

Indiana's Telephone Privacy law has given us our time back and our freedom to choose instead of having to answer the phone repeatedly and tell a person no - not once but at least 3 times that we were interested. If I want something I will contact the company - I do not want to be contacted and I really like the Indiana do not call ruling. Please don't change it!!
